EDUCATION

Chennai Institute of Technology 2024 – 2028
B.E. Computer Science and Engineering CGPA: **8.95/10**

SKILLS

Languages: C++, Python, TypeScript, JavaScript, SQL
Data Analysis: NumPy, Pandas, EDA, Matplotlib
Frontend: React.js, Next.js, Tailwind CSS, Zustand
Backend: Node.js, Express.js, FastAPI, REST APIs, NextAuth.js
AI/ML & Agents: TensorFlow, Scikit-learn, LLM APIs, Vector Search
Databases & Cloud: PostgreSQL, MongoDB, Firebase, Supabase
GenAI: Prompt Engineering, LangChain, LangGraph
Developer Tools: Git, GitHub, Postman, VS Code

ACHIEVEMENTS & LEADERSHIP

Hackathons:
- **Odoo Hackathon 2026** — **Winner (1st Place)**, ranked among 8,000+ participants, secured cash prize of **Rs. 1,70,000**.
- **HackBells 3.0** — **Winner (1st Place)**, ranked among 200+ participants, secured cash prize of **Rs. 1,00,000**.
- **Google Developer Groups TechSprint Hackathon** — **Winner (1st Place)**, received Google products worth **Rs. 60,000**.
- **CITIL SDG Hackathon** — **Runner-up (2nd Place)**, secured cash prize of **Rs. 25,000**.

Competitive Programming:
- **LeetCode** — Solved **900+** problems, earned **Guardian Badge**, with a maximum contest rating of **2129**.
- **SkillRack, CodeChef & Codeforces** — Solved **500+** problems on Skillrack, CodeChef rating **1450 (2-Star)**, and solved **100+** problems on Codeforces.

Event Operations & Leadership: Core Volunteer, Event Management Team; directed end-to-end venue logistics, operational scheduling, and crowd coordination for flagship college symposiums.

PROJECTS

NavX – Smart Indoor Navigation System Next.js, TypeScript, MongoDB, Node-NLP, HTML5 Canvas
- Engineered hierarchical graph routing using Dijkstra's algorithm across campus, building, and floor levels via Gateway Nodes.
- Built an interactive HTML5 Canvas editor with PIN verification and client-side compression for live visual map editing.
- Integrated a Node-NLP engine recognizing 30+ intent categories paired with QR code location syncing for automated wayfinding.

Intervion AI – Comprehensive Interview Preparation Suite React 19, TypeScript, Supabase, Groq, Gemini API
- Engineered an end-to-end interview marathon across 5 rounds (Resume ATS, Aptitude, Coding, GD, HR) using Zustand state.
- Orchestrated low-latency voice simulations for Group Discussions and adaptive HR interviews powered by Groq and Gemini APIs.
- Built a Supabase admin CMS supporting CSV question parsing and interactive Recharts telemetry for candidate readiness tracking.

Smart Heart – Multi-Modal Cardiovascular Diagnostic Platform Next.js, Python, FastAPI, TensorFlow, Librosa
- Trained dual deep-learning models (CNN for ECG, CRNN for PCG) achieving 97.4% accuracy across MIT-BIH and PTB benchmarks.
- Engineered an acoustic preprocessing pipeline using Mel-spectrograms and Grad-CAM heatmaps to interpret cardiac murmur intervals.
- Developed an asynchronous FastAPI backend delivering real-time, sub-second dual-modality risk scores and waveform telemetry.

GuardianLink – Mobile Emergency Coordination Platform Kotlin, Jetpack Compose, Firebase, Gemini API
- Architected an Android application with offline-first fallbacks for Gemini translation and media capture to ensure zero-crash reliability.
- Implemented real-time Firebase synchronization under MVVM to broadcast room-level triage updates between guests and responders.
- Built multimodal reporting supporting dynamic audio/video uploads and automated AI translation for multilingual emergency dispatch.

EXPERIENCE

Dynx Business Solutions Nov 2025
Full Stack Web Developer Intern Chennai, India
- Developed real-world web applications including a Weather App, Blog Platform, and Notes System using modern full-stack technologies.
- Built responsive interfaces with React, Next.js, Tailwind CSS, and implemented backend services using Node.js, Express, and MongoDB.
- Strengthened full-stack development skills by developing RESTful APIs, implementing CRUD operations, and following Git workflows.

Influenco May 2026 – Jun 2026
Frontend Developer Intern Chennai, India
- Built the complete frontend of an influencer marketing platform from scratch using Next.js, TypeScript, and Tailwind CSS.
- Developed responsive user interfaces for connecting influencers with clients, including authentication, dashboards, and profile pages.
- Collaborated with backend developers to integrate REST APIs and deliver a seamless, production-ready web application.

CERTIFICATIONS

Google For Developers – AIML | AWS Cloud Practitioner Essentials | IBM – AI Fundamentals
NPTEL – Data Analytics with Python | NPTEL – Introduction to IoT | MongoDB Basics for Students
